2023 Directory of Certified Portable Electric Room Air Cleaners

Edition No. 4 – October

©AHAM 2023

Independently Tested.
Consumer Trusted.

We're AHAM, the Association of Home Appliance Manufacturers, an organization that verifies the testing results of home appliances such as room air conditioners, dehumidifiers – and, of course, room air cleaners.

Since 1967, we have used outside labs to test products, and today you will find AHAM certified ratings on a variety of appliances. This makes comparing products easier for you.

All of the manufacturers listed in this directory voluntarily participate in the AHAM certification program for room air cleaners. This standardized measurement system – known as the Clean Air Delivery Rate, or CADR – determines how well an air cleaner reduces pollutants such as tobacco smoke, dust and pollen. From air cleaner to air cleaner, compare the CADR numbers listed next to each model number. First, look at suggested room size. Then refer to the tobacco smoke, dust and pollen CADR numbers. The higher the numbers, the faster the unit filters the pollutants out of the air. If from one unit to the other the ratings are the same, their air filtering performance is similar.

AHAM is now listing PM2.5 voluntarily in the directory. This reporting is optional for our Program Participants to share. We offer the option to give visibility to that metric as some consumers are looking specifically for PM 2.5 reduction.

Companies Licensed to Participate in the AHAM Portable Electric Room Air Cleaners Certification Program:

3M
Access Business Group
ACCO Brands USA, LLC
Airgle Corporation
Amway Korea LTD..
Aroma International LTD.
Aromacare Inc.
Best Buy Purchasing, LLC
BISSELL Homecare Inc.

Winix, Inc.
Zojirushi Corporation

The AHAM Certification Program for Portable Electric Room Air Cleaners

The Portable Electric Room Air Cleaner Certification Program is sponsored by the Association of Home Appliance Manufacturers (AHAM). The Program provides assurance to the public, through presence of the AHAM Certification Seal, that manufacturers' claimed ratings of Clean Air Delivery Rate (CADR) have been independently verified in accordance with ANSI/AHAM Standard AC-1, "Method for Measuring Performance of Portable Household Electric Room Air Cleaners".

Under the terms of the Certification Program, manufacturers certify CADR of a portable electric room air cleaner. An independent laboratory verifies the performance of random samples taken from factory, warehouse and dealer showrooms.

Participation in the Certification Program is voluntary and is open to all manufacturers and firms who market private brand models. As program sponsor and verifying authority, AHAM retains a laboratory (Intertek) to administer testing of sample units and to verify manufacturers' claimed ratings.

Program Scope

ANSI/AHAM Standard AC-1 applies to portable electric room air cleaners that remove particulate matter from the air and that have CADR ratings within the ranges noted below:

Tobacco Smoke	10 to 600 CADR
Dust	10 to 600 CADR
Pollen	25 to 450 CADR

Room Size Calculation

Room size is calculated using the following formula:

$$\text{Room Square Feet} = \text{Smoke CADR value} \times 1.55$$

$$\text{Room Square Meters} = \text{Smoke CADR value} \times 0.144$$

This formula is based on the CADR requirement to remove 80% of smoke particles, assuming one room air exchange per hour. The suggested room size stated on the seal of an AHAM Verifide air cleaner, will always be based on the air cleaner's ability to clean and circulate the air in the room 4.8 times per hour. Further information on this calculation can be obtained from AHAM.

PM2.5 CADR

PM2.5 describes fine inhalable particles, with diameters that are generally 2.5 micrometers and smaller. ANSI/AHAM AC-1-2020 released a measure for PM 2.5 CADR. The performance on PM 2.5 sized particles of an air cleaner is represented by a clean air delivery rate (CADR) based on the dust and tobacco smoke performance data. The diversity of particle natures and the sizes of the dust and smoke pollutants gives a well-balanced representation of the ultra-fine and fine particulate matters that define PM 2.5.

PM 2.5 CADR is obtained by combining the CADR of tobacco smoke particle sizes ranging from 0.1 and 0.5 microns with the CADR of dust particles that fall in the range of 0.5 to 2.5 microns and performing a geometric average calculation

The Seal

The AHAM Portable Electric Room Air Cleaner Certification Seal is a mark issued by AHAM to all manufacturers and private brand sellers of portable electric room air cleaners who are Licensees in the Certification Program. Under terms of the Program, the manufacturer certifies that the CADR of all portable electric room air cleaners bearing this mark are determined and accurately stated in accordance with the requirements of ANSI/AHAM Standard AC-1. The Certification Seal is required on all packaging of certified portable electric room air cleaners. Additionally, Program terms require that manufacturers display only CADR values for tobacco smoke, dust and pollen within the certification seal. The seal cannot imply certification of any other feature or performance factor

Directory

AHAM's Directory of Certified Portable Electric Room Air Cleaners lists current program models for each participating Licensee in the Program. The on-line directory is published biweekly and is available at www.ahamverifide.org. The PDF copy of the directory is published quarterly. The directory edition may include room air cleaner models that were produced during a previous directory period, but which have no scheduled production during the current period.

Note: If the word *WAS* is displayed next to a line, the data shown in that line was the previously certified data before the rating was changed as noted.

Ozone Emission Information

An ozone emission limit of 50 parts per billion (ppb) is recognized by the U.S. Food & Drug Administration for medical products and is referred to in U.S. EPA guidelines for indoor air quality. Underwriters Laboratories Safety Standard 867 recognizes 50 ppb as a maximum ozone emission limit. Participants may voluntarily provide certified ozone emissions data to UL Standard 867, Section 37, which is not subject to separate verification testing by AHAM. Additional information on ozone emission is available from individual manufacturers.

AHAM provides Program Licensees the opportunity to report portable electric room air cleaner compliance with UL 867, Part 37 in the AHAM Portable Electric Room Air Cleaner Directory. Inclusion of ozone emission information is voluntary. Ozone emission information is not part of the AHAM Certification Program for Portable Electric Room Air Cleaners and is not subject to independent verification testing by AHAM.

¹ This limit is also recognized by California Law AB2276-2006 for emissions from portable air cleaners sold in the state. There is no implication that ozone listing in this directory complies with the California ozone certification program for air cleaners.

Inquiries and Comments

Comments or questions on AHAM's Portable Electric Room Air Cleaner Certification Program should be directed to AHAM or visit our website at www.ahamverifide.org.
